Higher National Diploma in Information Technology
IT2042 – Data Communication & Networks
Lab Sheet – 02 –Part 1

Topic: Peer to Peer & Client-Server model.

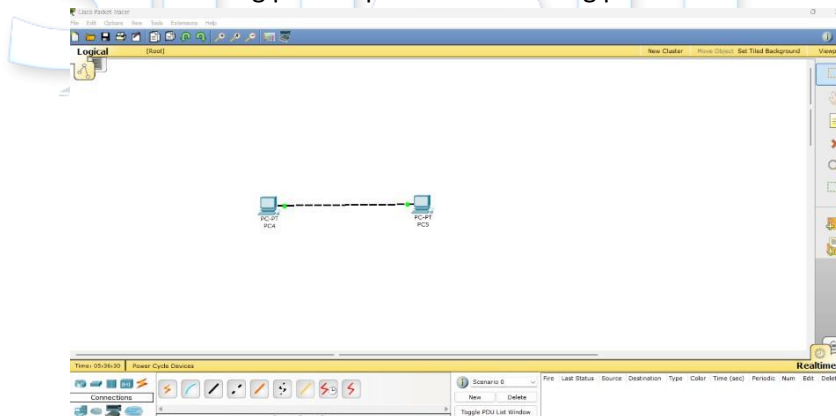

Objectives:

- Setup a peer to peer and client/server network using **Packet Tracer** software
- Understand the purpose of client/server networks
- Know the advantage and disadvantages of client/server networks

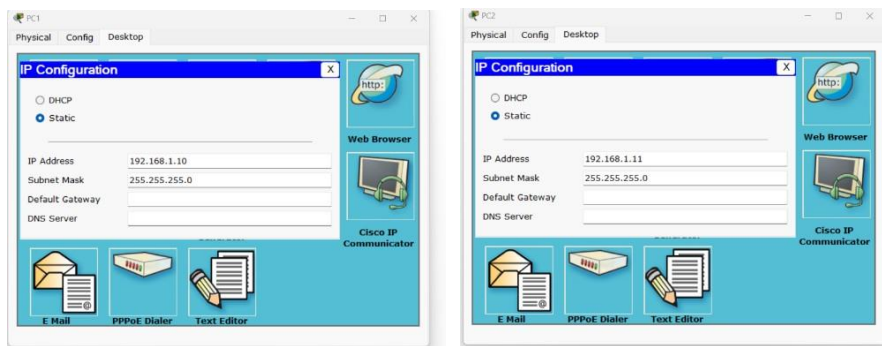

What to do: Install packet tracer software in to your computer. Create different types of client/server networks using packet tracer software. Find advantage and disadvantages of client/server networks.

Exercise 01:

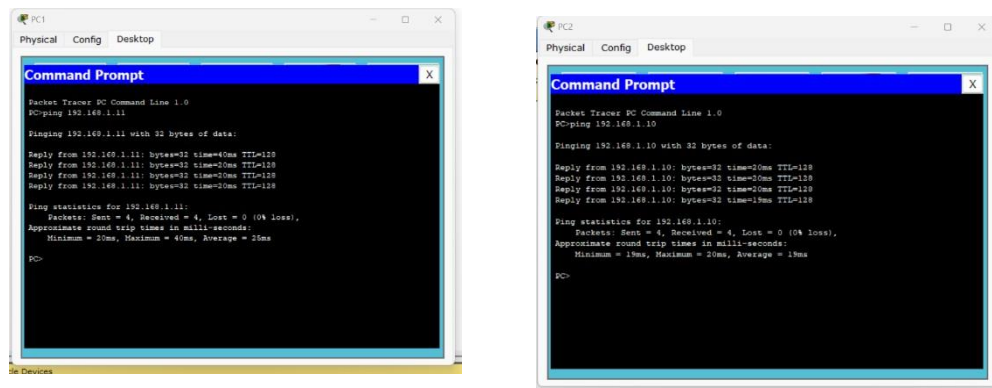

1. Create following peer to peer network using packet tracer

2. Setup following IP configurations both PC1 and PC2.

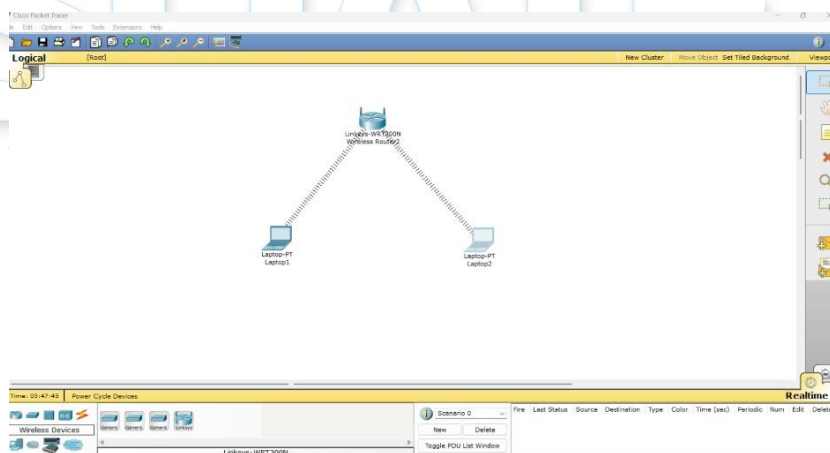

3. Check network connectivity PC1 to PC2 and PC2 to PC1

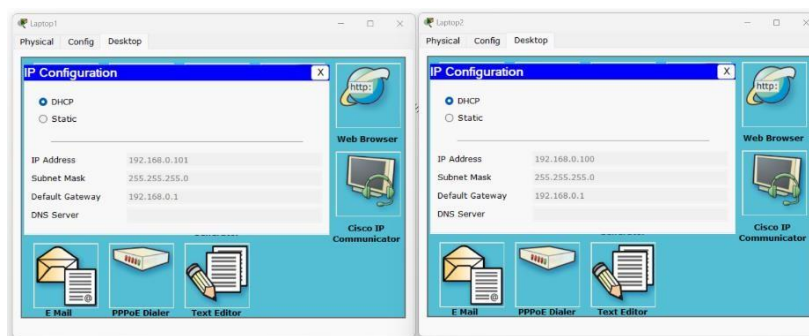

Exercise: 02

1. Create following peer to peer network using packet tracer

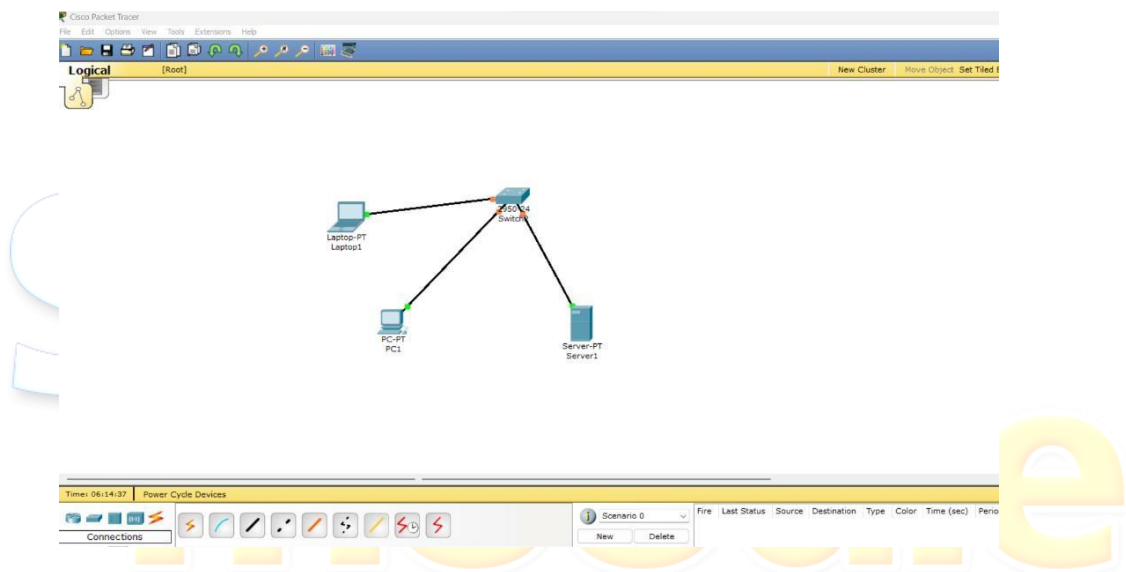

2. Setup following IP configurations both Laptop1 and Laptop2.

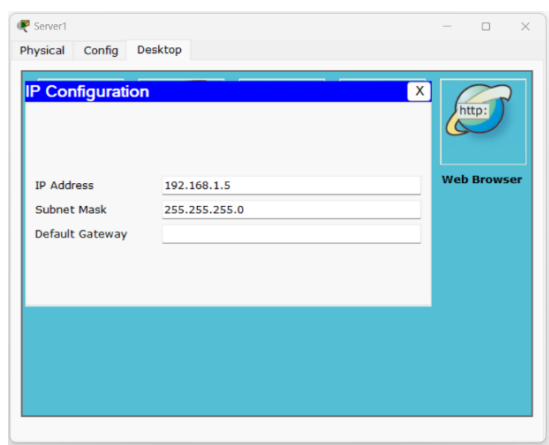

3. Check network connectivity Laptop1 to Laptop2 and Laptop2 to Laptop1

Exercise 03:

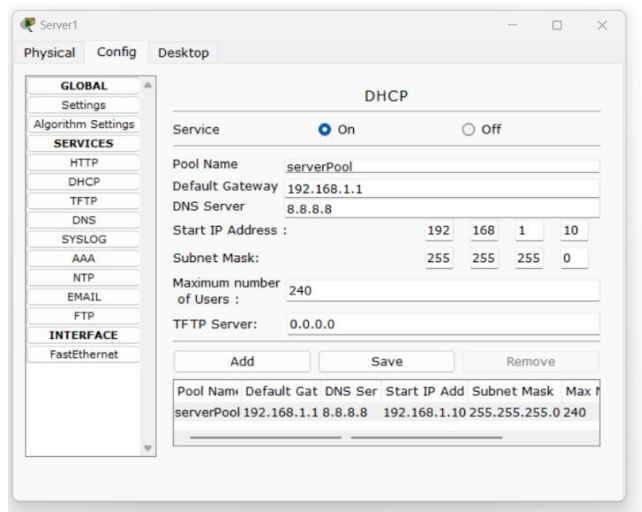

1. Create following client/server network using packet tracer

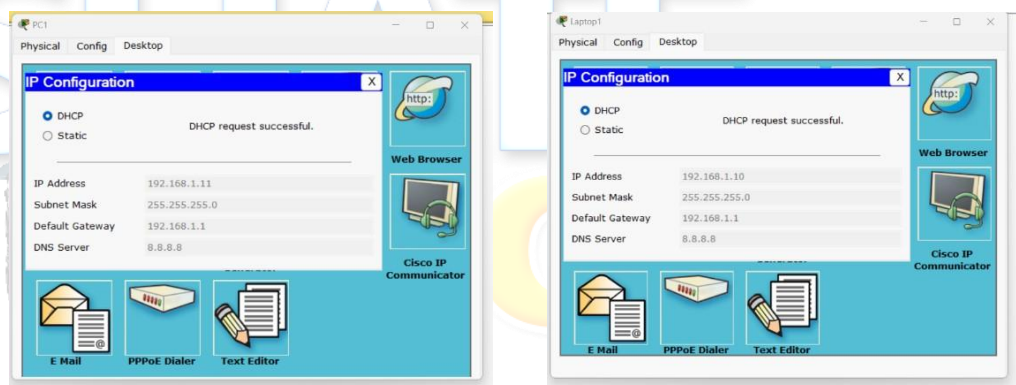

2. Setup following IP configurations Server1

3. Setup DHCP service in Server1

4. Setup following IP configurations both Laptop1 and PC1

5. Check network connectivity Laptop1 to PC1 and PC1 to Laptop1

Exercise 04: Find advantage and disadvantages of peer to peer and client/server network
